

Make Your Own Banner

Run-Through Banner

Draw/paint your design on an inexpensive flat bedsheet.
Sew a straight seam down each side of the sheet (lengthwise) for the pvc.
Cut it in half (lengthwise).
Attach velcro on each side that you cut so they can reattach making one sheet.
Space velcro down the middle so it's easier to break open.

Wider banner that the boys can run UNDER

Draw/paint your design on an inexpensive flat bedsheet (horizontally).
Sew a straight seam down each side of the sheet (short sides) for the pvc.

There are a million variations of these! Some people shred the bottoms of either design rather than cut down the middle. This creates a "car wash" kind of thing that the boys run through. Some attach streamers to the bottom, some sew felt/fabric rather than paint, etc.
